DETAILED ACTION

Applicant's cancellation of claims 5, 6 and 30-39 in the paper of 5/2/2006, is acknowledged. Claims 2, 11, 12, 13, 20, 21 and 23 are still at issue and are present for examination. The finality of the previous office action is withdrawn.

Claim Objections

Claims 2, 11, 12, 13, 20, 21 and 23 dependent from) are objected to because of the following informalities:

Claim 11 (claims 2, 12, 13, 20, 21 and 23 dependent from) recites "...is the complement of the nucleic acid ...". It is suggested that this be amended to "...is the **complete** complement of the nucleic acid ..." to avoid confusion.

Appropriate correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 13 is rejected under 35 USC §101 because the claimed invention is directed to non-statutory subject matter. The term "cell" as defined by the specification at page 17 line 27-28 states that a recombinant cell may be a eukaryotic organism. The scope of the claim, therefore, encompasses a human being, which is non-statutory

subject matter. As such, the recitation of the limitation "non-human" would be remedial.
See 1077 O.G. 24, April 21, 1987.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 13 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an isolated recombinant cell comprising a nucleic acid molecule of claim 11, does not reasonably provide enablement for a recombinant cell or tissue comprising a nucleic acid molecule of claim 11. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Factors to be considered in determining whether undue experimentation is required, are summarized in *In re Wands* (858 F.2d 731, 8 USPQ 2nd 1400 (Fed. Cir. 1988)) as follows: (1) the quantity of experimentation necessary, (2) the amount of direction or guidance presented, (3) the presence or absence of working examples, (4) the nature of the invention, (5) the state of the prior art, (6) the relative skill of those in the art, (7) the predictability or unpredictability of the art, and (8) the breadth of the claim(s).

Claim 13 is so broad as to encompass any recombinant cell or tissue comprising the nucleic acid molecule of claim 11. The scope of the claims is not commensurate

with the enablement provided by the disclosure with regard to those cells, which are not isolated and may be part of a transgenic organism or tissue. Applicant's specification defines that a recombinant cell may be a eukaryotic organism (page 17, line 27-28), however, applicants provide no examples or guidance enabling the generation of such transgenic tissues or organisms (eukaryotic).

Thus, applicants have not provided sufficient guidance to enable one of ordinary skill in the art to make and use the claimed invention in a manner reasonably correlated with the scope of the claims broadly including recombinant tissue or eukaryotic organism. The scope of the claims must bear a reasonable correlation with the scope of enablement (*In re Fisher*, 166 USPQ 19 24 (CCPA 1970)). Without sufficient guidance, determination of having the desired biological characteristics is unpredictable and the experimentation left to those skilled in the art is unnecessarily, and improperly, extensive and undue. See *In re Wands* 858 F.2d 731, 8 USPQ2nd 1400 (Fed. Cir, 1988).
